

COTOPHOTOCHAT		Introduction:	This is a free mobile application for sharing, saving and posting of cats photos.	
1-st Milestone	04.23.2023	Objective:	Providing timely feedback on the project to stakeholder. Early entry to market	
Delivery date	08.01.2023	Principles:	Functionality, speed and performance, listening to user's feedback	
In Scope		Entry Conditions (for test execution):	People	
1. Functional testing.		1. Completion of writing documentation.	1. Back-end dev	
2. Installation testing.		2. Approval of the test plan.	2. Android Kotlin Dev	
3. Perfomance testing.		3. Written checklist, test-cases.	3. iOS Dev	
4. Usability testing.		4. Checking the requirements for the application's functionality, including functions for uploading, saving and publishing photos of cats.	Test Environment	
5. Ui testing.		Exit Conditions (for test execution):		1. iOS, Android
6. Regression testing.				
Out of Scope		1. Everything included in the test plan has been completed.	Timescales (each iteration)	
1. Automation testing		2. No critical bugs.	1. Review of project requirements and preparation of the development plan 9 days.	
		Risks	2. Development of the application concept and design 30 days.	
			3. Development of application functionality and interaction with the database 30 days.	
			4. Writing tests 7 days.	
			5. Perfoming tests 7 days.	
			6. Preparing to launch the application, writing documentation and performing other tasks related to the release of the application 16 days.	
			7. Launch of the application 1 day
